A. Overhead Lines

B. Incoming Service Cable and Metering Equipment

C. Underground Cables

Before you start any work on your property, stop and think about the dangers of electricity.

Jersey Electricity takes public safety very seriously and we are here to help you stay safe.

Do not risk your safety!

Call Jersey Electricity first and we will identify, free of charge, where the electricity mains supply cables are located in and around YOUR property.

Jersey Electricity plc

The Powerhouse
PO Box 45, Queens Road
St. Helier, Jersey, JE4 8NY

DIGGING A HOLE OR SIMPLY KNOCKING DOWN A WALL CAN BE DANGEROUS IF APPROPRIATE CONTROLS ARE NOT IN PLACE BEFORE WORK STARTS

Our engineers sleeve overhead lines for your protection

A. OVERHEAD LINES

BEFORE erecting scaffolding or putting up a ladder to work within three metres of an overhead power line you **MUST** contact Jersey Electricity to arrange for us to check the installation.

If necessary, we will apply additional protection, plus give you free safety advice and guidance before you start work.

This applies to **ALL** overhead mains cables, whether they are supplying your individual property or running alongside your property, supplying other customers.

B. INCOMING SERVICE CABLE AND METERING EQUIPMENT

It is **IMPORTANT** to be aware of the position of **ALL** service cables and associated metering equipment coming into your home and you must **NOT** interfere with this equipment under any circumstances.

If you need to work near to this equipment, contact Jersey Electricity for **FREE ADVICE** before you start.

Advice on how to work safely around our metering equipment

Checking the precise location of our underground cables

C. UNDERGROUND CABLES

BEFORE you carry out any building excavations in your garden or on your property **ALWAYS** contact Jersey Electricity first to obtain records of any underground service or mains cables.

We are happy to provide **FREE** further advice on how to work safely within the vicinity of any live cables.
